I rely on xm traffic and weather on a daily basis. I drive truck for a living in many of the large cities that xm services with it's reports. I can tune in xm traffic and it will tell me immediately what the traffic problems in the area are and how to avoid them. Local radio stations do not do this on a regular basis. They only do this during rush hour and rush hour is not the only time there are traffic problems. I pay a monthly fee for these services and do not want them taken away because local radio cannot compete. I urge you to reject petition 04-160 and allow competition to continue in this great nation of ours.
